

ECM/EDM SOLUTION MATRIX

While there is no one ECM solution suitable for all companies, the span of solutions can be organized around a few basic dimensions. When you look at the needs of a particular company and their overall readiness, it can provide some guidance in terms of the type or category of ECM solution needed. ECM solutions do not have to be implemented all at once. Most companies should acquire a little ahead of their requirements to allow room for growth. Then they can begin to implement the solution according to highest priority requirements.
